December

This week in Nursery we have been learning to understand the different things that our brains help us with. Throughout the week, we have engaged in lots of activities to support the understanding of how incredible our brains are.

The children have absolutely loved meeting their new friends 'Berty' and 'Betty' who shared a story with us about what wonderful things our brains can do. We also discussed how our brains help us in controlling our emotions.

For home learning this week, I would like the children to make their very own glitter jar to put in our 'Toasty Corner' to provide them with a simple tool to soothe them when they're feeling worried or sad.

On the next page I have attached the resources need and the method to make the glitter jars.

I will look forward seeing your glitter jars!

Have a great weekend!

Many thanks,

Mrs Lukman

Resources needed:

- Clear plastic jars or containers with lids approximately jam jar sized.
- Glitter glue
- Water (slightly warm works best).

Instructions:

1. Pour 2-3cm of warm water into the jar.
2. Add glitter glue - you can use as little as 3 teaspoons (one small tube), but the effect is better if you use a bit more.
3. Put the lid on and shake the jar to mix the water and glitter glue.
4. Fill up the remainder of the jar with water and refit the lid.
5. If desired, use a hot glue gun to squeeze a bead of glue around where the lid meets the body of the jar, to discourage little hands from taking the lid off!
6. Shake the jar well to distribute the glitter.
7. Your DIY glitter jar is complete!
