homework

The children had a visit from the dentist this week and have been exploring the importance of healthy teeth and the different things we can do to support this. To continue with this, I would like the children to complete the following activities:

Discuss and sort the mouth myths or tooth truth statements. This does not need to be returned to school.

Discuss how they can look after their teeth and write a sentence or add words to the speech bubbles included in the picture. Alternatively, their thoughts could be scribed by an adult.

I have also included an oral hygiene sheet for your own reference.

Please could you add details via Class Dojo regarding your child's engagement and include photographs/comments.

Many thanks and have a great weekend,
Miss Alexander
