Homework Due:
Wednesday
22nd May

homework

This week the children have been investigating bees! This led them to create a beehive and we now need to fill it with some bees!

Therefore, I would like the children to create a bee. The bee could be made in a variety of ways, a painting, junk modelling, construction, clay, natural materials etc.

Please send all completed bees into school by Wednesday 22nd May. I am very excited to see the different types of bees we get for our hive.

In addition, please make comments and add photographs about your child's engagement with the activity via Class Dojo-messages.

I have also included a save the bees information sheet which we have shared in school in readiness for further bee adventures on World Bee Day on Monday 20th May.

Many thanks and have a wonderful weekend,
Miss Alexander

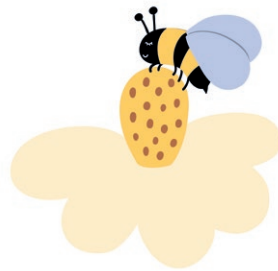

Save the Bees

The Facts

Bees are in decline on a global scale. They face many threats such as the destruction of their natural habitat, climate change and parasites and disease.

We depend so much on bees in our ecosystem, that there would be serious consequences if they were to disappear.

Most plants and crops depend on animal pollination, and one third of our food crops depend on bees.

How can I help?

If you see a bee struggling, gently put it onto a bee-friendly flower.

You could also offer the bee a drop of sugar water. This could give it enough of an energy boost to fly off.

Another way to help bees is to have lots of bee-friendly plants in your garden or balcony. Some examples of flowers that bees love are lavender, marigolds and wildflowers.
