

**Your first
piece of
homework!**

**Please complete
by:
Your first week at
school.**

Dear parents,

I am very excited to be welcoming your child to our reception class in September. In preparation for this I would like your child to complete a piece of homework.

We are going to create a class hive and I would like all of the children to create their own bee to be added to this which will form a display that will be part of the class throughout the year.

The bee can be created however you wish, the more creative the better! This could be junk modelling, clay, a paper plate, painting, lego... the possibilities are endless.

Please could completed work be brought into school during the first week of school. The children will then have the opportunity to share their bee and place it in our class hive. It is important that your child completes this piece of work so they have something to add as this will support them in feeling part of our class.

I am looking forward to seeing the children's variety of unique bees.

Many thanks,
Miss Alexander
