Friday 4th April 2025
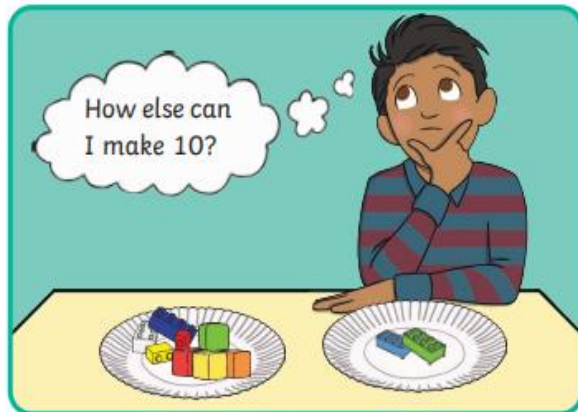

HOMEWORK SUPERSTAR

Please complete by:

Wednesday 9th April

For this weeks homework I would like children to complete the following maths activity focussed on number bonds to 10.

How else can I make 10?

Find ten small objects and two plates.

Grab some of the objects and put them on one of the plates.

Then, take the rest of the objects and put them on the other plate.

Count how many there are on each plate. What number bond did you find?

Try the game again, what other number bonds can you find?

Encourage your child's thinking with the following questions-

- How many do we have altogether?
- How many on this plate?
- How many on the other plate?
- What number bond did we find?
- How could we rearrange them to find another way of making ten?
- If there were zero objects on this plate, how many would be on that plate?
- Can you find another way of making ten?

Please complete by Wednesday 9th April. Comments, video clips and photographs can be added via ClassDojo messages.
Many thanks and have a wonderful weekend,
Miss Alexander
