# SATs Paper 2: Reasoning Worked Examples

A completed SATs reasoning  
paper for pupils to check.

**Year 6**

Name: .....

Class: .....

School: .....

Score: .....

## Instructions

This SATs reasoning paper has already been completed by a child, but they're not sure they've got all the answers correct.

Check each question carefully to see if the answers are correct or incorrect.

Where the answers are incorrect, explain the mistake and find the correct answer.

Where the answers are correct, evaluate the method that has been used.

Has the child used the most efficient method to solve the calculation?

Which method would you use?

1a Circle the number that is closest to 1,000

# Answers

Question Number	Question	Answer/ Explanation
1a	Circle the number that is closest to 1,000 <u>1,003</u> , 909, 1,090, 996	Correct
1b	Write the missing value to make this number sentence correct. $13,507 + 100 = 14,507$	Incorrect: The inverse has been correctly used but 1,000 has been subtracted instead of 100, <b>Correct answer: 14,407</b>
2	This table shows average house prices in five cities in Britain:  Which of these cities has the lowest average property price?  Edinburgh	Correct
3	Write the three missing digits to make this subtraction correct. $737 - 4\underline{2}3 = \underline{3}5\underline{4}$	Incorrect: The tens column has been read as $5 - 3$ , rather than identifying that an exchange is needed. This has then impacted on the calculation for the hundreds column (with exchanging, it would read $6 - 4$ ). <b>Correct answer: <math>737 - 483 = 254</math></b>
4a	This table shows the number of new car registrations in one year.  What was the combined total of the two highest selling brands?  $  \begin{array}{r}  62030 \\  + 56580 \\  \hline  118610  \end{array}  $	Correct

This has then impacted the short division. <b>Correct answer: 325g</b>

This has an impact on the final answer once it has been added to the previous two amounts of £185 and £34.20. <b>Correct answer: £753.20</b></p>
